

CONTINUOUS REDIAL

Get through to busy numbers as soon as they're free.

How it works:

You can save time dialing busy numbers over and over. Your phone rings you as soon as the line is free, and automatically connects you.

How to use:

1. When you hear a busy signal, press and release the “switchhook.” Listen for a special dial tone.

2. If you've already hung up, lift the handset and listen for a normal dial tone.

3. Press *66.

4. If the line is still busy, hang up. Your phone will check the number for up to 30 minutes

5. A special callback ring alerts you if the line becomes free (some phones ring normally).

6. Lift the handset to automatically place the call.

To cancel your Continuous Redial request:

1. Depress the “switchhook” and release. Listen for a special dial tone.

2. If you’ve already hung up, lift the handset and listen for a normal dial tone.

3. Press *86.

4. Listen for the confirmation tone or announcement.

5. Hang up.

Note:

- To start the 30-minute clock, repeat steps 1 - 4 under “How to use.”
- Continuous Redial can check as many as 15 busy lines at once for you. To know which call is being completed, you must subscribe to Caller ID service.
- Does not work on 800 type numbers, 900 numbers, numbers outside the specified service area, or on lines where Call Forward and some other call services have been activated.
- The “switchhook” is the button the handset pushes down when you hang up the phone. Some telephones have a Link or Flash key you can press instead.
