

TEEN OR PREFERENCE LINE

Know who the call is for – as soon as it rings!

How it works:

Two different phone numbers can be assigned to your home telephone line. Use one number for the adults ... a separate number for a home business or a separate number for the children. You can answer the phone differently for different callers.

How to use:

1. When someone dials your main telephone number, you'll hear normal ringing (one long ring).

2. When someone dials the other telephone number, you'll hear a special ring that identifies that number (such as two short rings).

3. Wait until the full ring pattern is complete before answering. You'll know whether the call is for you – and how you should greet the caller.

If you also have Call Waiting:

1. If someone dials your main number while you're on the phone, you'll hear a normal Call Waiting tone.

2. If someone dials the other number, you'll hear a special Call Waiting tone that identifies that particular number (such as two short tones).

Note:

- Only one conversation can be held at a time. Although you have more than one telephone number, you still have just one line.
